

# THE GREATEST OF ALL GREAT PIANO SALES

From now until Christmas Eve only, we offer the following unparalleled proposition to Ogden piano buyers. We will give Absolutely Free with each Piano sold a Three Months course of Music Lessons, under the best teachers in Ogden.

We have contracted with the following reputable teachers:

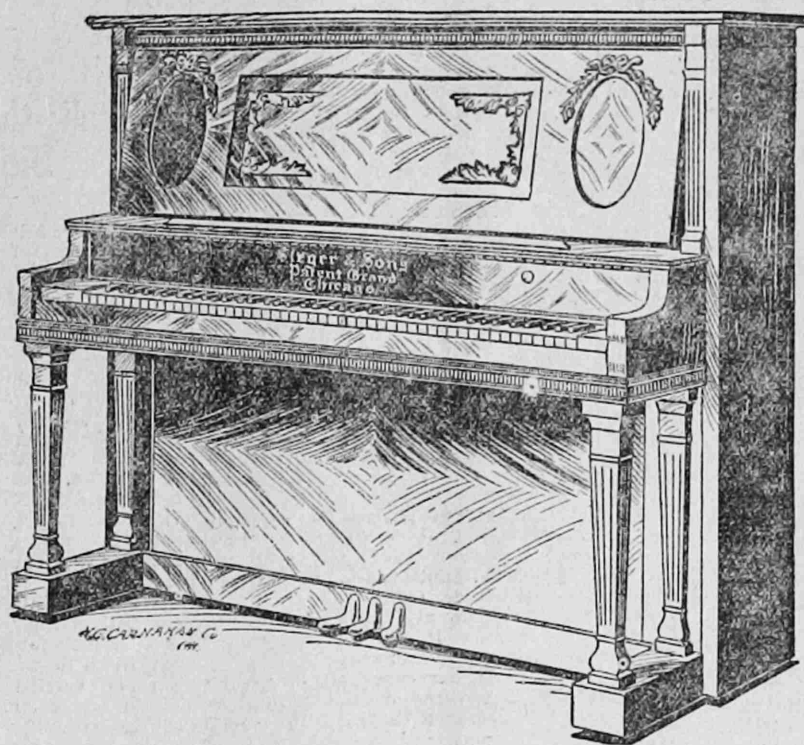

MISS ALMA BAUER, 350 23rd St., Ogden, is one of the most successful teachers of the piano in our city.

MR. SAM F. WHITAKER, Tabernacle organist, is a well-known teacher of high standing.

MISS JESSIE WELCH, organist at the First M. E. Church, is considered a thorough and competent teacher.

The fact that such reputable people are taking our pupils in hand should be sufficient inducement to the average piano purchaser, but we are making other and equally tempting inducements.

## Glen Bros. Piano Co.

Our Pianos are from the best known and highest class makers in the world.

THE STEGER piano is our leading make. Steger stands for the highest quality of workmanship and material, and its tone is of a quality that compels admiration, even from its competitors.

Our Reed & Sons Piano is one of the old high standard makes, that has delighted the hearts of music lovers since 1852.

Our Singer Piano is at the head of its class and wins friends wherever it is used.

## Glen Bros. Piano Co.

We intend to make this a Piano Sale that will be long remembered, and as a Special X-mas inducement, we are marking our Pianos from \$25.00 to \$50.00 less than regular. Our terms will also be reduced and a visit to our store will convince the most skeptical that our prices and terms offer the greatest piano value the buying public of Ogden ever had. Call and see us; our house is full to overflowing with beautiful high grade pianos—all styles, all kinds of beautiful fancy woods and finishes, on special sale at practically your own terms and price—and a three months course of music lessons FREE.

## SALT LAKE AND STATE NEWS

### STATE OFFICERS TALK OF SCHOOL AND HEALTH

Salt Lake, Nov. 30.—The Health Officers association of the state met in annual session in the council chamber at the city and county building today. Various questions of vital interest to the conduct of health departments were discussed in the papers read.

The morning session was called to order by the president, Dr. M. B. Shipp of Grantsville at 10:30 o'clock, and lasted until 1 o'clock this afternoon. An afternoon session, which assembled at 2 o'clock, will close with the annual election of officers at 5 o'clock. Tonight the State Health league will meet and the members of the Health Officers' association will be in attendance.

The program of today opened with an address by Dr. Joseph Sundwall, professor of bacteriology in the University of Utah, on "Hygiene in the Schoolroom." Dr. Sundwall took the position that hygiene in the schoolroom had three divisions. First, the teacher should undergo a physical examination to determine the soundness of his health. Second, the teacher should be familiar with the laws of health, and third, the child should be kept in hygienic condition.

The teacher, he said, he should be sound physically and should know something of hygiene and sanitation, of bacteriology, infection, ventilation and physical defects in children, such as eye strain, diseased tonsils and glands, dental hygiene, nutrition, deformities and symptoms of contagion. The health of children should be looked after, not only in the school room, but at home. Only from 5 to 10 per cent of the child's time is passed in school, so it is the duty of the teacher to investigate what sort of homes his pupils have. The condition of the child as to health is a barometer of home and social life. These may be improved by the teachers.

The child should be examined by a

physician in most cases, but the teacher can do a great deal in this direction.

Dr. Sundwall then dwelt upon the physical defects in children which are often responsible for dullness. He gave rules for a healthful schoolroom as to dimensions, ventilation and sanitation.

Dr. T. B. Beatty, secretary of the state board of health, led an informal discussion on the subject. Dr. Beatty said that the practical side of school hygiene for the health officer is what he is to do about it. He should never take his eye off the schoolrooms, since the danger lurking there is great. He has greater opportunities there than anywhere else to prevent the spread of disease by enforcing sanitary regulations.

Dr. H. P. Kirtley of Salt Lake City emphasized the importance of the proper lighting of schoolrooms and the effect of colors on pupils.

Dr. F. R. Slopansky of Helper suggested individual drinking cups. The president of the association, Dr. M. B. Shipp of Grantsville, and several others added brief remarks.

Dr. P. H. Raley of Salt Lake gave a paper on "Quarantine." Dr. Raley defined quarantine and gave a brief history of it. He said that it dated from 1444.

Dr. Raley considered quarantine as applied to individual persons and households and outlined the duties of parents, patients, doctors, the public and health officers with regard to quarantine.

Dr. Raley took the position that every case of contagious disease is due to some other case. Hence the importance of isolation, and the fighting of each case, as if it were the first case. The doctor considered quarantine regulations with regard to smallpox, scarlet fever and diphtheria.

"The quarantine flag should be respected as the stars and stripes," said Dr. Raley in conclusion.

Dr. Beatty added further emphasis to Dr. Raley's position on the importance of the isolation of contagious diseases.

Jeremiah Nolan, health officer of Castleton, Utah, whose family live in this city, reported garbage regulation in Salt Lake City and took a few shots at the local health officers. He said during the summer garbage was allowed to accumulate for a week before it was removed and sometimes a longer time than a week elapsed before the decaying vegetation was taken away.

"Garbage is allowed to remain on the street in open receptacles and is hauled away through the streets in open wagons. If any disease germs exist in this decaying matter there is certainly opportunity for their spread."

"I have often complained to the city officers, but have been told to 'kick' myself. If the city health officers would do their duty it would not be necessary for the state health authorities to interfere."

"Rules are of no use unless they are enforced."

"While in quarantine for smallpox I have been told that I might go out if I would go at night when no one could see me."

The president said that no member of the association of health officers would condone any infringement of any law of quarantine or any other violation of a law of health of any community.

The following program is being carried out this afternoon:

"Vaccination," Dr. Ralph Richards, Salt Lake.

"Flies as Carriers of Contagious Diseases," Dr. Voorhies of University of Utah.

"Bacteriology and Public Health," Dr. Junkin, state bacteriologist.

"Tuberculin Test," Dr. Brimhall of the federal bureau of animal industry.

"Defective Vision and Hearing," Dr. Fred Stauffer, Salt Lake.

"Duties of Health Officers," Dr. T. B. Beatty, Salt Lake.

The following are among those in attendance:

Dr. H. M. Vance, Pleasant Grove; Dr. H. P. Kirtley, Salt Lake; G. H. Fennimore, Newhouse; N. W. Ellerson, Mona; Dr. R. J. Smith, Collins; Dr. Ross Anderson, Mount Pleasant; Dr. J. C. Clarke, Monroe; James T. Daly, Panguitch; Dr. E. G. Hughes, Provo; William Mathers, Weber county; Dr. H. A. Adamson, Richmond; Dr. F. R. Slopansky, Helper; Dr. W. J. Bardsley, Park City; M. S. Whitehouse, Lincoln; Dr. J. L. Arstzen, Silver; William McFarlane, St. John; G. Bennett, Davis county; James Marston, Weber county; Charles Parker, Davis county; Dr. J. A. Hensel, Tooele county; B. F. Blaylock, Weber county; L. Peterson, Hyde Park; Robert McFarland, Weber county; S. G. Wangsagad, Weber county; A. Hardy, Davis county; Dr. D. A. MacGregor, Beaver county; Henry Thompson, Forney; A. Keyes, Weber county; Charles Parker, Weber county; J. B. Sylvester, Elsinore; C. J. Jensen, Weber county; Dr. W. L. Rich, Box Elder county; James Overton, Leamington; J. N. Cone, Mapleton; Dr. F. J. Burton, Milford; Dr. D. A. MacGregor, Beaver county; Henry Thompson, Forney; W. J. Wagstaff, Charleston; John Meacham, Wallburg; Dr. A. G. Stoddard, Walter James, Vernon; S. Gleason, Kaysville; Dr. M. B. Shipp, Grantsville; Dr. T. B. Beatty, Salt Lake City.

SALT LAKE BOARD OF EDUCATION INVESTIGATES.

Salt Lake, Nov. 30.—The board of education may have another investigation on its hands and one that seriously affects the efficiency of the schools for a large part of the year. Complaints that coal of an unusually bad quality has been supplied this season have been frequent since the opening of the schools.

The trouble arising from the coal culminated this week when several of the buildings nearly had to close Monday because of the low temperature. The same trouble existed this morning. The janitors of a number of the schools found it impossible to get a higher temperature than 60 degrees and this was much better than Monday morning, when the children sat in some of the rooms with wraps on. The chief complaints have come from the Wasatch, Franklin, Fremont, Jackson and Sumner schools, but it is said that other schools have been affected.

J. T. Hammond, president of the board, is making some inquiries today in company with other members. The contract called for the Martin Coal company to furnish one-half the supply. C. S. Martin, member of the board of education from the First

ward, is head of the Martin Coal company. Martin seemed to see no impropriety in a member of the board thus profiting financially from the board's business transactions.

The statement has been made since the coal became bad that it was furnished by the Martin company, and there are those who think that if a member of the board of education supplies coal to the city schools it should at least be of reasonably good quality.

BIG SLAUGHTER AT UTAH STATE PRISON

Twenty-two lives were blotted out yesterday morning before the executioner's gun at the state prison. Twenty-two graves each four feet square were dug in a field on the prison reserve and twenty-two bodies were laid to their final resting places in quantities of quicklime.

There were no friends of the condemned to stand outside and weep. There were no ministers to pray and there were no formalities to the execution. It was the biggest execution in the history of the prison.

But the lives were not those of human beings—they were merely unfortunate cattle which have become afflicted with tuberculosis. They were examined two weeks ago by Dr. A. C. Young, state veterinarian, and were found to be in an advanced stage of the disease. As there was danger of the spread of the disease in the prison if the milk from the cows were used, Dr. Young advised that they be

headed, is head of the Martin Coal company. Martin seemed to see no impropriety in a member of the board thus profiting financially from the board's business transactions.
